This is an opportunity to join an exciting new study which aims to implement a nurse-led model of care in general practice to improve access to long-acting reversible contraception (LARC) and medical abortion for women in rural and regional Australia.

### WE ARE OFFERING GPs & NURSES FREE ONLINE TRAINING & SUPPORT

- Education on LARC and medical abortion to support your delivery of these services.
- Access to clinical experts to assist your practice with implementation and workflow
- Access to AusCAPPs, an active online network of professional peer support and expertise to support your delivery of LARC and medical abortion care

### IS YOUR PRACTICE ELIGIBLE?

To be eligible, general practices must:

- Be located in rural or regional Australia (MM2-MM7)
- Have at least 2 GPs and 1 practice nurse enrolled in the study with a practice manager serving as a liaison
- Have some weekly overlap in GP-nurse clinic worktime

### FINANCIAL INCENTIVES

Practices will receive a total of $1300 in financial incentives to compensate their time including:

- $500 reimbursement for GPs and $200 for practice nurses on completion of training activities
- $100 gift card for practice managers for serving as the study liaison
- $500 for practices at the end of the trial period

Potential to achieve CPD points including:

- RACGP (4 points) and ACRRM accredited contraceptive implant insertion and removal training
- CPD points/hours for participation in education activities (pending RACGP/ACRRM/ACN accreditation).
